Summary: MMPR/DT time travel fic.

## Son of the Greatest Ranger

Disclaimer: I don't own anything.

Discussion and monster attack.

Connor P.O.V.

I drove as fast as I legally could towards Dr. O's house. I finally arrived and jumped out of his car, and knocked. Dr. Tommy Oliver- my science teacher, mentor, and teammate- opened the door. "Connor? What are you doing here?" he asked. "My parents know." I said simply. Dr. O ushered me inside and we sat down in the living room. "Tell me everything." he said.

"I walked into my house after today's battle when my mom asked me to sit down so she, my dad, and I could have a talk. The last time she said this was when I was 8 and found out I was adopted. Anyways as soon as I sat down dad said that they knew I was a power ranger and that you were one of the originals." I started.

"What? I've never met your parents until your parent teacher conference." he said, shocked. "It started about three months after my brother Eric was born, we're not actually twins we just say that since we look almost exactly alike, my parents were driving back from visiting family when the car broke down in the middle of nowhere near Angel Grove. Dad noticed a huge building, so he, mom, and baby Eric went to ask for help. The door was open, so they walked right in. when they entered the main room they were shocked to see a robot and a floating head." I began to recount my parent's explanation, but was interrupted by Dr. O. "Zordon and Alpha." He said. I nodded.

"Dad had pushed mom, who was holding Eric, behind him. Zordon then introduced himself and explained why he was here, as well as the power rangers. Being the good people they were, my parents offered to help in any way they could. Then a girl no older than 17 walked in carrying a small bundle. She said that she was from the future and explained that she was one of the future power rangers, and that she needed help protecting her baby. She explained that while in her time she was retired my birthfather was still an active Ranger and had made many enemies. My adopted parents gladly took me in." I finished.

Dr. O looked troubled then our morphers went off. "This is Connor. I'm with Dr. O." I said. "There's a weird energy signature near the school. It's not a dino gem or dino egg. Kira, Ethan, and Trent are already on their way." Haley's voice said. "We're on our way." I said. We morphed and called our raptor riders. When we arrived Kira, Ethan, and Trent were fighting Tryanodrones and Zeltrax, while a swirling portal floated above the soccer field. I used my super speed to run over to join Kira.

Dr. O P.O.V.

I hung back to see where I was needed most. As I watch Conner and Kira fight together, I couldn't not help but be reminded of me and Kim when we were rangers. I had a guess who Conner's birthmother is, if I'm right, then I might have been working with my son without even knowing it. Finally, I joined Ethan and Trent, who were fighting Zeltrax. After 15 minutes all the tyrannodrones were defeated and we all ganged up on Zeltrax.

But our victory did not last, he got a lucky shot and knocked Ethan and Trent to the ground demorphing from the impact and having exhausted themselves fighting him. "Enjoy your time Dr. Oliver, for when I'm done you and your team will never have existed." Zeltrax said before entering the portal. "He got away, but what did he mean, Dr. O?" Kira asked. "That portal is a time vortex that allows someone to travel to the past. He plans to kill me when I'm a teenager, thus changing our present." I said. "We have to go after him. Or the team is done for." Conner said. I nodded and we all ran into the portal.

End  
file.
